DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by DE 3520146.

DE 3520146 describes a temperature dependent actuator for controlling the temperature of the fluid to be heated. It includes a temperature controlled pressure regulating valve including a flow restricting means (9) and the capsule (2) is in fluid communication with the fluid to be heated. The capsule includes a fluid responsive fluid which expands or reacts depending on the fluid temperature and thus increases/decreases the pressure in the confines of the capsule and hence causes the piston to extend/retract. This in turn either allows or cuts off the supply of fluid.

Allowable Subject Matter

Claims 2-10 allowed.

The prior art does not teach the inclusion of the claimed temperature controlled pressure regulation valve in combination with the portable hand tool for killing vegetation. No suggestion exists in the art to modify the state of the art to so include.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
